TEM Systems, Inc.
Attention: Mr. Scott Roether, Vice President
4880 N. Hiatus Rd.
Sunrise, Fl. 33351

Dear Scott:

Our Board of Directors at Vinceremos want to thank you and TEM Systems for this generous donation of the security system installed at our Center. We feel it is the solution to the bold invasion of our property and the problem we have had with tails being cut. You need to know that we have had many discussions at Board meetings on how we ever would be able to solve this security issue, which has gone back years to the vandalism of the property when we first bought it, and then the two golf carts that were stolen and most recently the tails cut. We would have dismissed such an elaborate security system as way beyond our means.

We so appreciate your generosity and we must tell you that our girls living on the property are sleeping much sounder with this security system in place. If ever we can be a testimony to "the source behind the solution" we would love for you to call on us. We note with interest how those cameras were used to catch a policeman in Chicago beating up a bartender for refusing to serve him. That has been played on CNN all week. This all will make our staff and volunteers be more observant of the safety rules we have in place. A nice fringe benefit! It is like the omnipotent One watching over us.

Again, we can't thank you enough for stepping up to solve this big problem for us.

Sincerely,

Ruth Menor, Executive Director
